PLEASE RECYCLE

WASTE MANAGEMENT TEAM

EARTH DEPENDS ON US

Recycling Reduces Waste Products

Landfills are mostly composed of non-biodegradable waste which takes long time to decompose. By recycling, we can lessen the waste materials that are placed into landfills and we are able to make the most out of these materials. If we don't recycle, more and more garbage will go to landfills.

Recycling Helps you Save Money

Recycling provides ways to save money. You can sell recyclable materials to organizations that are willing to buy it. Using products that are recycled lessens expenses. Products that are made from recycled materials are less expensive than products made from fresh materials.

Keep Bizana Clean

Members from all wards can make money from recycling. All the bottles or cans can be sent to **SASUKA Recycling** at Bizana.

Recycling Saves Energy

It takes less energy to process recycled materials, it takes a lot less energy to recycle paper than to create new paper from trees. The energy from transporting materials from the source is also saved. Saving energy also has its own benefits like decreasing pollution. This creates less stress on own health and our economy.

Vision

Mbizana aims to be a flourishing local municipal area with a growing economy creating employment and sustainable communities where everyone has access to equal opportunities.
